Summary:

Frontend focused Software Engineering student with practical experience building responsive web applications using React, JavaScript and Tailwind CSS. Comfortable with GitHub based workflows and focused on clean, maintainable UI development.

Projects:

Portfolio-React.js | [Source Code](#)

- Built a responsive personal portfolio using React.js, focusing on component-based architecture, reusable UI components and clean state management.
- Deployed live on GitHub Pages for easy access.

ElectroParts: Industrial E-Commerce Website (React.js) | [Source Code](#)

- ElectroParts Web Platform Built and deployed a responsive industrial component hub utilizing React, Vite, and GitHub Actions.
- Optimized the frontend for sub second load times and implemented sophisticated CSS Grid architectures and GLSL animations to differentiate the brand in a traditional B2B market.

React-Password-Generator-Program | [Source Code](#)

- Developed a password generator using React.js, allowing users to create secure passwords based on selectable criteria.
- Implemented state management, controlled inputs and dynamic UI updates.

Calculator-app (Javascript) | [Source Code](#)

- Built a functional calculator supporting “arithmetic” operations.
- Practiced DOM manipulation and event handling for smooth UX.

Technical Skills

- Frontend: React.js, JavaScript (ES6+), HTML5, Tailwind CSS
- Programming: JavaScript, C
- Tools: GitHub, GitHub Pages, DataCamp
- Practices: Responsive design, component based UI, debugging

Additional Courses:

- Python Essentials II - Cisco Networking Academy (2026)
- Python Essentials I - Cisco Networking Academy (2025)
- Building APIs in Python - DataCamp (2025)
- Office and Productivity Software - The Hong Kong University of Science and Technology (2021)

EDUCATION:

- OSTİM Technical University | Türkiye | 2022 - Present
